## **Family Day Care Quality Assurance Quality Trends Report**

**For the period 1 January 2007 to 30 June 2007**

The purpose of this *Quality Trends Report* is to identify key areas within Family Day Care Quality Assurance (FDCQA) that family day care schemes are performing well in and those which contribute to schemes receiving a Not Accredited status.

The Quality Areas and Principles referred to in this document are detailed in the FDCQA *Quality Practices Guide* (2<sup>nd</sup> edition, 2004) available for purchase from the National Childcare Accreditation Council (NCAC) website ([www.ncac.gov.au](http://www.ncac.gov.au)). Where references are made to numbered indicators, these are listed in the FDCQA *Validation Report* (2<sup>nd</sup> edition, 2004).

*Quality Trends Reports* are conducted twice annually by NCAC, in January and July each year, for each of the Child Care Quality Assurance systems. Past reports are publicly available on the NCAC website ([www.ncac.gov.au](http://www.ncac.gov.au)) as follows:

- *FDCQA Quality Trends Report* (1 July 2005 - 31 December 2005)
- *FDCQA Quality Trends Report* (1 January 2006 - 30 June 2006)
- *FDCQA Quality Trends Report* (1 July 2006 - 31 December 2006)

## FDCQA Quality Trends Report

As at 1 July 2007, 329 family day care schemes were registered with NCAC to participate in FDCQA and **89.3 %** of family day care schemes that have completed the 5 steps to Child Care Quality Assurance are Accredited. Of these services, **44%** have achieved High Quality in all 6 Quality Areas. This is a significant achievement for family day care schemes progressing through FDCQA.

**51** family day care schemes received Accreditation Decisions between 1 January 2007 and 30 June 2007.

### The Principles for which schemes most often achieve a High Quality standard are:

1.3	Communication between carers and families is effective and supports the family and child to settle into care	45%
1.4	Carers' personal and family arrangements provide a positive home environment that supports the provision of family day care	57%
2.1	The indoor and outdoor areas of carers' homes and play session venues are welcoming, comfortable and child friendly	51%
2.3	Facilities used by the coordination unit are welcoming and accessible	47%
3.2	Coordination unit staff support children's learning through home visits and/or play sessions	55%
3.3	Carers and coordination unit staff guide children's behaviour in positive ways	45%
3.4	Carers and coordination unit staff promote resilience and social competence in all children	47%
4.5	Children's needs for rest, sleep and comfort are supported	65%
5.1	Recruitment, selection and orientation processes for carers and coordination unit staff encourage and support the provision of a quality service	53%
5.2	The scheme has a systematic process in place to monitor current practice and identify areas for continuing improvement	45%
6.1	Management practices are ethical and operate within relevant legislation	49%
6.5	Carers and coordination unit staff are effective advocates for their service within the community and actively seek to build links with other agencies to benefit children and their families	47%

### The Principles for which schemes have most often not met the Satisfactory standards are:

1.4	Carers' personal and family arrangements provide a positive home environment that supports the provision of family day care	12%
3.3	Carers and coordination unit staff guide children's behaviour in positive ways	16%
4.1	The environments provided for children are safe	23%
4.3	The health and safety of all children are protected	18%
4.4	Nappy changing, toileting and bathing are positive experiences for children	20%
4.6	Current State or Territory legislation relating to child protection and wellbeing is implemented consistently	18%
6.4	The scheme has simple and transparent grievance and complaints handling procedures	12%

## Quality Area 1: Interactions

---

Positive interactions between children, families, carers and coordination unit staff are integral to a successful program and should support the development of trusting relationships, partnerships and teamwork within the scheme and with the wider community.

Partnerships with families are promoted by responsive and supportive carers, coordination unit staff and management and are fundamental to all aspects of the program, from orientation to ongoing information sharing. It is particularly important that children experience interactions that make them feel valued, respected and capable. By modelling courteous, considerate and effective communication, adults support children as they develop their communication and problem solving skills.

Interactions should ensure that all stakeholders in the service feel valued and respected and should take into account the different backgrounds, requirements and communication skills of individuals. Effective communication strategies can be developed through ongoing consultation between all stakeholders and should be reviewed regularly. Interactions that are founded upon respect, empathy, cooperation and professionalism ensure that all communications are successful and positive (FDCQA *Quality Practices Guide*, 2004, page 9).

### Quality Trends:

Most family day care schemes achieved Good to High Quality in this Quality Area. However a significant proportion of schemes did not meet the Accreditation standards of Principle 1.4.

---

### Quality Area 1 has five Principles:

**Principle 1.1:** Carers and coordination unit staff interact with all children in a warm, friendly and respectful way

Principle 1.1	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	39	61	0	0

Principle 1.1 was not rated Unsatisfactory.

**Principle 1.2:** Communication between coordination unit staff and families is effective and supports the child's placement in care

Principle 1.2	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	41	57	0	2

Principle 1.2 was rarely rated Unsatisfactory.

**Principle 1.3:** Communication between carers and families is effective and supports the family and child to settle into care

Principle 1.3	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	45	49	2	4

Principle 1.3 was rarely rated Unsatisfactory.

**Principle 1.4:** Carers' personal and family arrangements provide a positive home environment that supports the provision of family day care

Principle 1.4	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	57	31	0	12

In Principle 1.4 the indicator that most often resulted in Unsatisfactory ratings was:

**Indicator 1.4.5** *The scheme has clear, written guidelines about the roles other members of carers' families have in relation to the carer's provision of family day care*

**Principle 1.5:** Relationships within the scheme value diversity, teamwork, mutual respect, understanding and professionalism

Principle 1.5	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	43	55	0	2

Principle 1.5 was rarely rated Unsatisfactory.

## Quality Area 2: Physical Environment

---

Environments that are welcoming, safe, well resourced and aesthetically appealing support children and their families to access and settle into family day care and enhance effective learning settings for children. When planning a physical environment that supports children's play and development, carers and coordination unit staff work together to provide a safe environment which allows all children to explore, experiment and make decisions according to their individual needs and ability levels.

When planning and obtaining resources for the physical environment, carers and coordination unit staff consider factors such as the needs and backgrounds of individual children and their families, the existing family day care home, coordination unit environments and costs.

Carers foster children's learning experiences by using inexpensive resources and aspects of the family day care home in flexible and innovative ways. Relevant professional development opportunities and opportunities to network with other carers, support carers in developing their skills and strategies for creative planning.

Regular consultation between families, children, carers and coordination unit staff and knowledge of current safety recommendations, support the provision of functional child and family friendly settings (FDCQA *Quality Practices Guide*, 2004, page 21).

### Quality Trends:

Most family day care schemes achieved Good to High Quality in this Quality Area.

---

### Quality Area 2 has three Principles:

**Principle 2.1:** The indoor and outdoor areas of carers' homes and play session\* venues are welcoming, comfortable and child friendly

Principle 2.1	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	51	47	2	0

Principle 2.1 was not rated Unsatisfactory.

---

\* For the purposes of FDCQA, the term "play session" is used to describe the situation where two (or more) carers join together with their children for child focussed play experiences. Play sessions may be organised by the carers themselves or by coordination unit staff.

**Principle 2.2:** All children have access to a variety of interesting materials and equipment

Principle 2.2	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	43	51	2	4

Principle 2.2 was rarely rated Unsatisfactory.

**Principle 2.3:** Facilities used by the coordination unit are welcoming and accessible

Principle 2.3	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	47	49	2	2

Principle 2.3 was rarely rated Unsatisfactory.

## Quality Area 3: Children's Experiences, Learning and Development

---

Successful learning environments recognise the value of play and positive social interactions in the promotion of children's learning and development. Children's learning and development is enhanced through opportunities to make choices and guide their own experiences according to their individual interests, personalities and skills. Children's learning occurs through planned and spontaneous experiences, during their participation in daily routines and through their experience of positive modelling by adults and peers.

A supportive learning environment is underpinned by behaviour guidance strategies which respect individual children's needs and abilities, and which foster the development of children's self-management skills.

A holistic approach to children's learning and development recognises the significance of creative and child-initiated play to the growth of children's self-esteem and personal competence.

Carers and coordination unit staff ensure that the balance between planned, spontaneous and routine experiences allows time and opportunity for children to engage in learning through a range of play and other learning experiences (FDCQA *Quality Practices Guide*, 2004, page 29).

### Quality Trends:

Most family day care schemes achieved Good to High Quality in this Quality Area. However, a significant proportion of schemes did not meet the Accreditation standards of Principle 3.3.

---

### Quality Area 3 has seven Principles:

**Principle 3.1:** Carers respond to the interests and abilities of all children in ways that support learning in a home environment

Principle 3.1	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	18	72	6	4

Principle 3.1 was rarely rated Unsatisfactory.

**Principle 3.2:** Coordination unit staff support children's learning through home visits and/or play sessions\*

Principle 3.2	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	55	39	4	2

Principle 3.2 was rarely rated Unsatisfactory.

**Principle 3.3:** Carers and coordination unit staff guide children's behaviour in positive ways

Principle 3.3	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	45	37	2	16

In Principle 3.3 the indicators that most often resulted in Unsatisfactory ratings were:

**Indicator 3.3.2** *The policy on positive guidance of child behaviour is dated and sourced*

**Indicator 3.3.11** *Skills in guiding children's behaviour are enhanced through professional development*

**Principle 3.4:** Carers and coordination unit staff promote resilience and social competence in all children

Principle 3.4	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	47	53	0	0

Principle 3.4 was not rated Unsatisfactory.

---

\* For the purposes of FDCQA, the term "play session" is used to describe the situation where two (or more) carers join together with their children for child focussed play experiences. Play sessions may be organised by the carers themselves or by coordination unit staff.

**Principle 3.5:** Carers and coordination unit staff promote physical competence in all children

Principle 3.5	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	29	65	4	2

Principle 3.5 was rarely rated Unsatisfactory.

**Principle 3.6:** Carers and coordination unit staff foster all children's language, literacy, curiosity, mathematical thinking and scientific exploration

Principle 3.6	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	27	69	4	0

Principle 3.6 was not rated Unsatisfactory.

**Principle 3.7:** Carers and coordination unit staff support all children's creative expression

Principle 3.7	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	10	86	4	0

Principle 3.7 was not rated Unsatisfactory.

## Quality Area 4: Health, Hygiene, Nutrition, Safety and Wellbeing

---

Family day care homes constitute a unique child care setting as they have the dual functions of both family home and child care environment. To ensure that children receive quality care, coordination unit staff and carers share a responsibility to keep up to date with current research and recommended practice in relation to child health, hygiene, nutrition, safety and emergency procedures.

It is essential that scheme staff and carers are aware of and meet all State or Territory legal requirements for children's safety and wellbeing, particularly in relation to child protection.

Regardless of their individual skills or backgrounds, all children have the right to experience quality care in an environment which is clean, safe, healthy and where their wellbeing is a paramount consideration in the program. In exercising their duty of care, carers and coordination unit staff consider the unique aspects of the family day care environment, and the individual needs and cultural backgrounds of children and families. This is of particular importance when planning for children's mealtimes, their sleep or rest requirements, their dressing requirements and their personal hygiene (FDCQA *Quality Practices Guide*, 2004, page 45).

### Quality Trends:

Most family day care schemes achieved Good to High Quality in this Quality Area. However, a significant proportion of schemes did not meet the Accreditation standards of each Principle in this Quality Area.

---

### Quality Area 4 has six Principles:

**Principle 4.1:** The environments provided for children are safe

Principle 4.1	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	22	45	10	23

In Principle 4.1 the indicators that most often resulted in Unsatisfactory ratings were:

- Indicator 4.1.1** *The scheme has written safety policies and procedures that are based on current advice from relevant safety authorities*
- Indicator 4.1.2** *Safety policies and procedures are dated and sourced*
- Indicator 4.1.3** *The scheme safety procedures are implemented consistently by coordination unit staff and carers*
- Indicator 4.1.5** *Medications, detergents, cleaning products, garden chemicals and other dangerous products are clearly labelled and inaccessible to children at all times*
- Indicator 4.1.12** *The scheme has a policy on sun protection that is dated and sourced and based on current advice from recognised safety authorities*
- Indicator 4.1.13** *Carers' and coordination unit staff efforts to protect children from exposure to the sun are consistent with the sun protection policy*
- Indicator 4.1.14** *Carers and coordination unit staff model sun protection practices*

**Principle 4.2:** Food and drink are nutritious and culturally appropriate

Principle 4.2	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	17	61	12	10

In Principle 4.2 the indicators that most often resulted in Unsatisfactory ratings were:

- Indicator 4.2.2** *The scheme's nutrition policy is dated and sourced*
- Indicator 4.2.7** *The scheme has written food handling policies and procedures that are based on current advice from relevant health and safety authorities*
- Indicator 4.2.8** *The scheme's food handling policies and procedures are dated and sourced*
- Indicator 4.2.10** *Coordination unit staff provide carers and families with food handling and storage guidelines based on the scheme's food handling policies*

**Principle 4.3:** The health and safety of all children are protected

Principle 4.3	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	27	43	12	18

In Principle 4.3 the indicators that most often resulted in Unsatisfactory ratings were:

- Indicator 4.3.2** *Policies and procedures on infection control, illness, administering medication, accident and emergency are dated and sourced*
- Indicator 4.3.6** *Carers discuss with children strategies for maintaining dental health*
- Indicator 4.3.13** *Health plans for children with specific medical conditions have been developed in consultation with families, are based on advice given to the families by medical practitioners and are implemented consistently*

**Principle 4.4:** Nappy changing, toileting and bathing are positive experiences for children

Principle 4.4	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	39	33	8	20

In Principle 4.4 the indicators that most often resulted in Unsatisfactory ratings were:

- Indicator 4.4.1** *The scheme has written policies and procedures for nappy changing, toileting and bathing that are consistent with current recommendations by recognised health authorities*
- Indicator 4.4.2** *Policies and procedures for nappy changing, toileting and bathing are dated and sourced*
- Indicator 4.4.3** *The scheme procedures for bathing, nappy changing and/or toileting are implemented consistently*

**Principle 4.5:** Children's needs for rest, sleep and comfort are supported

Principle 4.5	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	65	25	2	8

In Principle 4.5 the indicators that most often resulted in Unsatisfactory ratings were:

- Indicator 4.5.1** *The scheme has a policy relating to selection and use of cots, beds and bedding that is based on current advice from recognised safety authorities*
- Indicator 4.5.2** *The policy related to the selection and use of cots, beds and bedding is dated and sourced*

**Principle 4.6:** Current State or Territory legislation relating to child protection and wellbeing is implemented consistently

Principle 4.6	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	39	41	2	18

In Principle 4.6 the indicators that most often resulted in Unsatisfactory ratings were:

- Indicator 4.6.2** *Child protection policies and procedures are dated and sourced*
- Indicator 4.6.5** *During the initial training program and during the past eighteen months, all carers and coordination unit staff have been provided with training in responding to suspected child protection issues*
- Indicator 4.6.6** *Carers' families have been provided with information and/or training to support their understanding and response to suspected child protection issues as they relate to the provision of family day care*

## Quality Area 5: Carers and Coordination Unit Staff

---

Coordination unit staff are responsible for ensuring there are procedures, policies and systems in place to maintain quality in the scheme's activities, programs and organisation. Coordination unit staff work with carers, families and other professionals to ensure that the scheme's personnel policies and procedures are effective and meet all relevant legislative requirements, including occupational health and safety regulations. Acknowledging and promoting the value of professional development and effective recruitment practices is fundamental in advocating for the scheme and the professionalism of its staff and carers.

Coordination unit staff, carers and families evaluate the scheme's achievements and identify future areas for improvement from the perspectives of all individuals involved. All stakeholders have regular opportunities to contribute to reviews of the scheme's quality practices and procedures and to collaborate in the development of ongoing improvement plans. Encouraging families, carers and coordination unit staff to work together on continuing improvement strategies supports the development of practical and relevant approaches to all scheme operations (FDCQA *Quality Practices Guide*, 2004, page 59).

### Quality Trends:

Most family day care schemes achieved Good to High Quality in this Quality Area. However, a significant proportion of schemes did not meet the Accreditation standards of Principle 5.1.

---

### Quality Area 5 has four Principles:

**Principle 5.1:** Recruitment, selection and orientation processes for carers and coordination unit staff encourage and support the provision of a quality service

Principle 5.1	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	53	35	2	10

In Principle 5.1 the indicator that most often resulted in Unsatisfactory ratings was:

**Indicator 5.1.2** *Policies and procedures for the recruitment and selection of carers and coordination unit staff are dated and sourced*

**Principle 5.2:** The scheme has a systematic process in place to monitor current practice and identify areas for continuing improvement

Principle 5.2	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	45	47	2	6

In Principle 5.2 the indicator that most often resulted in Unsatisfactory ratings was:

**Indicator 5.2.4** *The scheme has policies and procedures about conducting visits in a carer's home*

**Principle 5.3:** Professional development opportunities are accessed by carers, coordination unit staff and others involved in management

Principle 5.3	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	20	72	2	6

In Principle 5.3 the indicator that most often resulted in Unsatisfactory ratings was:

**Indicator 5.3.1** *The scheme has a training and development policy that actively supports the ongoing professional development of carers, coordination unit staff and other involved in management*

**Principle 5.4:** The scheme promotes occupational health and safety

Principle 5.4	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	33	59	4	4

Principle 5.4 was rarely rated Unsatisfactory.

## Quality Area 6: Management and Administration

It is the role of scheme management and coordination unit staff to establish effective and ethical management policies and procedures. Scheme policies and procedures must be informed by relevant legislative requirements, current 'best practice' in management and also reflect an awareness of community needs and issues.

Comprehensive written policies and procedures provide clear guidance to coordination unit staff, carers and families in relation to management issues. Involvement of all stakeholders in policy review and development fosters an atmosphere of trust and teamwork and helps ensure that policies and procedures address real needs and are implemented consistently and effectively.

An essential element of quality scheme management is ensuring that clear and consistent procedures for the maintenance and confidential management of family, child, carer and staff records are implemented.

Decision making, grievance and complaints handling policies and procedures are transparent and clearly define accountability (FDCQA *Quality Practices Guide*, 2004, page 69).

### Quality Trends:

Most family day care schemes achieved Good to High Quality in this Quality Area. However, a significant proportion of schemes did not meet the Accreditation standards of Principle 6.4.

### Quality Area 6 has five Principles:

**Principle 6.1:** Management practices are ethical and operate within relevant legislation

Principle 6.1	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	49	47	2	2

Principle 6.1 was rarely rated Unsatisfactory.

**Principle 6.2:** The scheme consults and works collaboratively with all stakeholders

Principle 6.2	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	37	47	10	6

In Principle 6.2 the indicator that most often resulted in Unsatisfactory ratings was:

**Indicator 6.2.5** *Carers, families and coordination unit staff are actively involved in the development and review of scheme policies and procedures*

**Principle 6.3:** The scheme has an efficient, effective and ethical process for the management of records

Principle 6.3	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	33	45	16	6

In Principle 6.3 the indicator that most often resulted in Unsatisfactory ratings was:

**Indicator 6.3.1** *The scheme has clear written policies and procedures for managing records relating to children, families, carers and coordination unit staff*

**Principle 6.4:** The scheme has simple, transparent grievance and complaints handling procedures

Principle 6.4	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	31	49	8	12

In Principle 6.4 the indicator that most often resulted in Unsatisfactory ratings was:

**Indicator 6.4.2** *The scheme's grievance and complaints policies and procedures are dated and sourced*

**Principle 6.5:** Carers and coordination unit staff are effective advocates for their service within the community and actively seek to build links with other agencies to benefit children and their families

Principle 6.5	High Quality	Good Quality	Satisfactory	Unsatisfactory
%	47	39	12	2

Principle 6.5 was rarely rated Unsatisfactory.

## Family Day Care Quality Assurance Quality Trends

The National Childcare Accreditation Council has conducted four FDCQA *Quality Trends Reports* for family day care schemes:

- *FDCQA Quality Trends Report* (1 July 2005 – 31 December 2005)
- *FDCQA Quality Trends Report* (1 January 2006 – 30 June 2006)
- *FDCQA Quality Trends Report* (1 July 2006 – 31 December 2006)
- *FDCQA Quality Trends Report* (1 January 2007 – 30 June 2007)

These *Reports* demonstrate a number of quality trends in the performance of family day care schemes against the standards of quality care outlined in the *FDCQA Quality Practices Guide* (2<sup>nd</sup> edition, 2004).

Please note: The December 2006 *FDCQA Quality Trends Report* reported the quality trends of 154 FDCQA Accreditation Decisions. Between 1 January 2007 and 30 June 2007 only 51 family day care schemes received Accreditation Decisions. This difference should be taken into account when reviewing the quality trends in this report.

### **Notable trends in the data include:**

- The achievement of all 6 Quality Areas at a High Quality level by 65% of family day care schemes that received an Accreditation Decision during this period.
- A significant increase in the proportion of High Quality ratings achieved across 19 of the 30 Principles between the December 2006 and June 2007 reporting periods, of an average 9 percentage points.
- Between the December 2005 and June 2007 reporting periods, High Quality ratings increased across 27 of the 30 Principles by an average 16 percentage points. This indicates significant improvement in the quality of care provided by family day care schemes over time.
- The proportion of Unsatisfactory ratings decreased for 15 of the 30 Principles between the December 2006 and June 2007 reporting periods by an average of 5 percentage points. Unsatisfactory ratings increased for 10 of the 30 Principles by an average of 3 percentage points.
- In the June 2006 reporting period there were eleven individual indicators for which more than 20% of schemes received Unsatisfactory ratings, which decreased to two individual indicators in the December 2006 reporting period.

There were no individual indicators for which more than 20% of schemes received Unsatisfactory ratings in the June 2007 reporting period, demonstrating significant improvement in the quality of care provided by family day care schemes.

- Quality Area 4: Health, Hygiene, Nutrition, Safety and Wellbeing, continues to receive a significantly higher proportion of Unsatisfactory ratings than any other Quality Area.

Failure to date and source written policies and procedures contributed significantly to the relatively high proportion of schemes receiving Unsatisfactory ratings across Quality Area 4: Health, Hygiene, Nutrition, Safety and Wellbeing.

- A significant proportion of Unsatisfactory ratings across several Quality Areas were related to the development, implementation, dating and sourcing of policies and procedures in the following areas:

Principle	Policy and Procedure
3.3	Child behaviour guidance
4.1	Safety
4.1	Sun protection
4.2	Nutrition and food handling
4.3	Infection control, illness, administering medication, accident and emergency
4.4	Nappy changing, toileting and bathing
4.5	Selection and use of cots, beds and bedding
5.1	Recruitment and selection of carers
6.2	Development and review of policies and procedures
6.3	Records management
6.4	Grievance and complaints handling

- The strengths of family day care schemes can be seen in those Principles for which for which no Unsatisfactory ratings were received between 1 January 2007 and 30 June 2007, which include:

Principle	
1.1	Carers and coordination unit staff interact with all children in a warm friendly and respectful way
2.1	The indoor and outdoor areas of carers' homes and play session venues are welcoming, comfortable and child friendly
3.4	Carers and coordination unit staff promote resilience and social competence in all children
3.6	Carers and coordination unit staff foster all children's language, literacy, curiosity, mathematical thinking and scientific exploration
3.7	Carers and coordination unit staff support all children's creative expression

## NCAC Support for Services

The purpose of this *FDCQA Quality Trends Report* is to identify key areas within FDCQA that family day care schemes are performing well in and those which contribute to schemes receiving a Not Accredited status.

NCAC aims to work in partnership with family day care schemes to facilitate and support continuous improvement to the quality of child care provided for children in Australia. The *FDCQA Quality Trends Report* assists NCAC to provide targeted support to schemes as they progress through FDCQA.

NCAC has implemented several initiatives, addressing concerns raised in the *FDCQA Quality Trends Reports* as follows:

- The *NCAC Policy Development Guide* was introduced in October 2006, to assist services to research, develop and review policies in collaboration with stakeholders. The *NCAC Policy Development Guide* is available on the NCAC website ([www.ncac.gov.au](http://www.ncac.gov.au)).
- NCAC's newsletter, *Putting Children First*, is distributed quarterly to all services participating in the Child Care Quality Assurance systems. Recent articles supporting quality practices include:
  - *Special Feature: Developing and Reviewing Policies* (December 2007)
  - *Protecting Children: Strategies for Creating Safe Environments* (March 2007)
  - *Professional Development* (June 2007)
  - *Typical Practice in Child Care Services* (June 2007)
  - *CCQA Without Folders* (June 2007)
- *NCAC Factsheets* are distributed to all family day care schemes registered to participate in FDCQA to provide information to child care professionals regarding quality practices. New *Factsheets* for family day care schemes were developed and distributed in early 2007 as follows:

<b>Factsheets</b>	<b>Relevant Principles</b>
<i>Animals and Domestic Pets</i>	4.1
<i>Keeping Developmental Records</i>	
<i>Children in Overnight Care</i>	1.4, 4.3, 4.4, 4.5
<i>Programs for Under Twos</i>	1.1, 1.3, 3.2, 3.3, 3.4, 3.5, 3.6, 3.7
<i>Smoke Free Environments</i>	4.1, 4.5, 4.6

NCAC will continue to use the information provided in the *FDCQA Quality Trends Reports* to develop ways to effectively support family day care schemes participating in FDCQA.

## Family Day Care Quality Assurance

### Principle Ratings

Comparative statistics of the December 2005, June 2006, December 2006 and June 2007  
Quality Trends Reports

Quality Area 1		High Quality (%)	Good Quality (%)	Satisfactory (%)	Unsatisfactory (%)
Principle 1.1	Dec-05	29	64	7	0
	Jun-06	39	57	4	0
	Dec-06	41	58	1	0
	Jun-07	39	61	0	0
Principle 1.2	Dec-05	42	48	3	7
	Jun-06	32	62	2	4
	Dec-06	48	49	2	1
	Jun-07	41	57	0	2
Principle 1.3	Dec-05	22	52	19	7
	Jun-06	28	62	4	6
	Dec-06	35	56	6	3
	Jun-07	45	49	2	4
Principle 1.4	Dec-05	39	35	3	23
	Jun-06	44	39	1	16
	Dec-06	49	42	3	6
